## Why Enigma?

Brand Promise

Since we founded in **2008**, we've consistently explored opportunities to **simplify bespoke** and **complex building** methods

Replacing them with dependable systems that deliver consistent, premium outcomes. We focused on specialist doors and that's still the core of our business now.

There are three key promises we keep to add value to our customers:

Scan QR to view more  
[enimapocketdoors.com/why-enigma](https://enimapocketdoors.com/why-enigma)

PROTECT

**Reduce every potential risk** to a minimum

**Unrivalled experience of large, complex projects and pioneering fire safety assurance.**

*We never walk away from a problem*

INNOVATE

We have a **legacy of**  
industry-leading **innovation**

Our continuous development drive has led us to  
the forefront of industry innovation.

*Our innovations become  
the industry norms*

SUPPORT

Give **detailed project**  
**assistance** at every stage

Proven process and industry expertise to  
ensure everything works out as intended.

*Support surrounding  
your project*

## Why Enigma?

Core Values

We own a set of **principles that we live by.** These ten core values run through the heart of our organisation

Whether it be the products and services we provide, the way we treat our staff or the way we run the business. We apply these values to everything that we do:

## Why Pocket Doors?

System Benefits

# Maximise Value with Pocket Doors

Apartments with  
x26 Swing Doors

x26 Pocket Doors  
**= 39m<sup>2</sup>**  
**MORE SPACE!**

*Saves the space  
of a Bedroom  
& En-suite!*

## Optimise Space

Maximise the value of your development with pocket doors:

- ✓ Maximise your Floor Space
- ✓ Maximise the number of Apartments in your Development
- ✓ Make your Interior Design stand out from the crowd!

Swing Door vs. Pocket Door

[enigmapocketdoors.com/maximise-value](https://enigmapocketdoors.com/maximise-value)

## Enhance **Design**

Concealed frame, shadow-gap or visible trim options are available in a range of flexible sizes. The simple, modular design allows for rapid installation. Adapt your design with optional features, such as:

- ✓ **Full-height**
- ✓ **Perpendicular Wall**
- ✓ **Bespoke Joinery Integration**
- ✓ **Offset Wall Thickness**

## Increase **Versatility**

Enhance your interiors with high performance pocket doors which increase versatility by offering acoustic reduction, power assistance or even as room dividers to extend space for entertaining.

- ✓ **Room Dividers**
- ✓ **Enhanced Disabled Access**
- ✓ **Power-assisted Opening**
- ✓ **Acoustic, Smoke and Fire-rated Options**

## Why Enigma Pocket Doors?

System Benefits

# Better by *Design*

### System Design

The pocket door must operate smoothly and consistently without hampering the user experience.

Quality hardware is paramount for a fluid, soft close, as opposed to a wobbly, squeaky rattle! The system must also be designed so that it is easy to install consistently, limiting performance issues which may arise from poor installation.

*See p12 for Pocket Door Kits*

- 1 Trim Options**  
Concealed, Shadow-gap or Visible Trim options to suit your interior design.
- 2 Aluminium Box-section Construction**  
Durable construction giving maximum strength for the minimum wall thickness.
- 3 100k Cycle-tested (under load)**  
Rigorously tested to withstand a lifetime of use for complete peace of mind.
- 4 Up to 140kg Load**  
The super strong construction is capable of supporting solid timber doors up to 140kg.
- 5 Stud-like Construction**  
Adaptable to support bespoke joinery, perpendicular walls, off-set wall build-ups.
- 6 Ribbed Side Studs**  
Provide additional grip and stability when fixing the drywall.
- 7 Design Support**  
We can help you achieve the best possible design and specification with our vast experience of different projects using different interfaces and materials.

# Why Enigma Pocket Doors?

Kit Components

FSC Responsibly  
Sourced Timber

## Base Channel

The leading edge and intermediate jambs slot into the base channel of the Enigma pocket door system and are fixed into place. The door guide pin is used to keep the door in-line.

## Gear Sets

The standard sliding gear set is surface-mounted to the top of the sliding door and runs within the Head Channel. The gear sets are tested to EN 1527 1998 up to 100,000 cycles.

## Head Channel Junction

The leading edge and intermediate jambs are slotted into the head channel and fixed into place once plumb.

## Strike Jamb

The strike jamb features rubber batwing seals so when the door is closed the leaf sits within the sealed recess. The door frame is either concealed by jointing up to, or visible trims are added.

## Leading Edge Jamb

The leading edge jamb of the Enigma pocket door system is the leading support of the pocket which has a side flange for the plasterboard to butt up against.

## Intermediate Jamb

The intermediate jamb forms the rest of the pocket. The aluminum profile has a timber insert which provides extra strength and facilitates easy fixing.

## Head Channel

The head channel for the Enigma pocket doors is the same width as the stud, making it simple to accurately place and fix to the head stud.

## Pocket Door Kits

Range Overview

# The most *comprehensive* pocket door range

### Standard Non Fire Rated

The original pocket door system

14

### Glazed Metal Framed *Fenestra*®

Metal-framed pocket door leafs

26

### EI30 Fire Rated

30 minute fire rated

16

### Telescopic

Double-door spans within the footprint of single

28

### Acoustic Rated

Up to 30dB acoustic attenuation with added smoke rating

18

### Glass Leaf

Allow light to travel through rooms

30

### Power-assisted *Motus*®

Slide open and closed with powered pocket doors

24

## Design **Versatility**

Never compromise functionality or beautiful design, when it comes to using pocket doors.

We offer a comprehensive range of options including fire-rated, acoustic, and smoke-rated pocket doors, as well as concealed, shadow gap, or visible trim designs to empower, rather than constrain designers' creativity. Additionally, the inclusion of a self-supporting head can be utilised when the pocket door kit cannot be directly attached to the ceiling or floor slab.

*See p14 for Pocket Door Kits*

## Enhanced **Accessibility**

A contactless electromagnetic propulsion system silently opens and closes doors with minimal to no user handling required.

By eliminating the need for physical contact, it offers a hygienic and convenient solution, particularly in environments where cleanliness and ease of access are paramount such as healthcare facilities, commercial buildings, or residential settings. The advanced propulsion system ensures smooth and efficient door operation while enhancing overall user experience.

*See p24 for Power-assisted Pocket Doors*

## Rapid **Installation**

Installation is incredibly simple and fast with user-friendly instructions and straightforward assembly.

Even those with limited experience can easily complete the installation process in no time. We are also the only supplier to offer a pre-assembled kit for large quantity orders, minimising errors and simplifying scheduling for tradespeople. Increasingly popular for their space-saving benefits and factory-built quality assurance.

*See p34 for Pocket Door Enhancements*

## Pocket Door Kits

# Standard Non Fire Rated

The original pocket door kit has been refined for modern construction methods to maximise space and elevate design aesthetics where fire rating isn't necessary.

Premium components and cutting-edge innovation, promising an unparalleled experience. Commonly found in apartment buildings, they grace corridors leading to bathrooms and bedrooms, elevating spaces with their exceptional quality and design.

### Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

## Pocket Door Kits

# Acoustic Rated

Reduce the transmission of sound, quickly and simply with an EI30Sa acoustic rated sliding pocket door which offers 30 minute fire and smoke protection.

Within contemporary open-plan spaces, it's essential to have the ability to isolate sound when needed. Acoustic pocket doors are the perfect solution, allowing for the maximum amount of clear floor space whilst open, with the required reduction in sound when closed.

### Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

## Pocket Door Kits

# Power Assisted *Motus*<sup>®</sup>

Power-assisted pocket doors utilise a contactless electro magnetic propulsion system to silently open and close the door with no or minimal user handling.

The standard method to control the powered doors is by using 'nudge and go'; simply nudge the door open or closed and Motus will assist with the rest. An optional 'Touchless sensor' can be fitted to the wall, simply move your hand in front of the sensor to activate the door.

### Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

## Pocket Door Kits

# Glazed Metal Leaf *Fenestra*<sup>®</sup>

**A touch of glass! Aluminium framed glazed pocket doors are an elegant, effective way of making an interior design statement.**

A luxury upgrade for high end residential applications, beautifully engineered for architects, designers and end users. Each door leaf is custom made to your specification.

### Configurations

Fenestra is built to your individual project requirements in a range of different design styles.

Scan QR to view more  
[enigmapocketdoors.com/glazed-metal-leaf](https://enigmapocketdoors.com/glazed-metal-leaf)

### *Fenestra*<sup>®</sup> Framed Glass

6-8mm thick glass enclosed within a aluminium frame for the ultimate 'Picture-frame' feature pocket door.

### *Fenestra*<sup>®</sup> Ladder Design

Horizontal bars integrated within the door frame break-up the glazing to create a subtle Art-Deco design style.

### *Fenestra*<sup>®</sup> Glazing & Infill

Completely customisable the door can combine glazing, horizontal and vertical bars as well as infill panels.

## Performance

Sustainably sourced timber parts.  
System tested to over 100k cycles.  
Supports doors up to 140kg.

100k Cycle Load Tested

Supports up to 140kg Doors

Self-supporting Head

Perpendicular Wall

## Pocket Door Kits

# Telescopic

The telescopic opening feature enables two door leaves to slide into a single pocket, allowing you to create double-door spans within the footprint of a single door.

The perfect solution to provide wide-access without the constraints of neighbouring walls or the inconvenience of traditional double doors.

Telescopic Kit Illustrations  
Concealed Frame & Strike Jamb

### Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

## Pocket Door Kits

# Glass Leaf

For the ultimate frameless finish, the Enigma system can be provided with a glass leaf enabling you to retain light and control privacy.

When using a glass leaf the opening width of the jambs are reduced to suit the thinner door. Specially designed glass clamps are provided with the sliding gear.

## Technical Details

Enigma Pocket Doors

# Trim options to suit your interior design

### Concealed Frame

Enhance your contemporary interior with a minimalist design and seamless aesthetics.

### Shadow-gap Frame

Creating clean, minimalist lines, Shadow Gap adds a subtle, unique feature to the room.

### Visible Trim

An elegant, traditional look, Visible Trim Enigma is for use with architraves.

## Door Leaf options

### Laminated Timber

Solid timber core with hardwood lippings on all 4 sides with a tough laminate coating for added durability.

### Painted Timber

Solid timber core with hardwood lippings on all 4 sides, painted to a RAL colour of your choice.

### Veneered Timber

Solid timber core with hardwood lippings on all 4 sides, veneered in your choice of timber.

### Glass

Glass leaf for enhanced light and style. Choose from clear or obscured/privacy glass.

## Technical Details

Enigma Pocket Doors

# Optional enhancements elevating user experience

### Pre-assembled Kit

Revolutionising installation convenience with pre-assembled kits tailored to seamlessly fit your structural openings.

### Full Height Flush Head Kit

Full height, floor to ceiling Enigma doors give the ultimate open and spacious feel. Available in both non fire rated and EI30 configurations.

### Self-supporting Head Kit

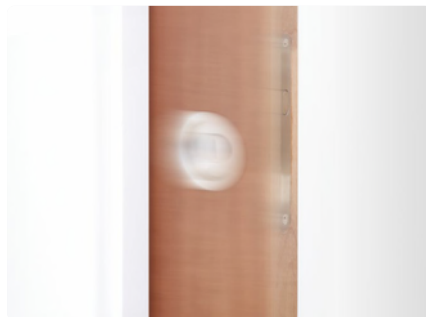

For situations where fit the head of the pocket door kit won't fit directly to the ceilings, or floor slab and deflection tolerance is required. Enables the head to be fitted either end and support up to 120kg.

## Perpendicular Wall

Used for applications where a door closes against a flat wall; the perpendicular wall jamb profile is provided.

Order Code  
SEL-PRT-00924

## Soft Close/Open

Dampened opening and closure to create the ultimate finish to the sliding doors. The modular unit makes installation simple.

Order Code  
SEL-PRT-00368 / SEL-PRT-00557

## Self-close

The closer is provided with infinite adjustment providing an extremely user friendly experience. Suitable for doors up to 900mm wide.

Order Code  
SEL-PRT-00923

## Touch Latch

130N touch latch allows you to completely conceal the door leaf within the cavity and removes the need for a finger pull.

Order Code  
SEL-PRT-00619

## Simultaneous Opening

Open both doors while only operating one leaf. Available on timber leaf kits only.

Order Code  
SEL-PRT-00924

## Handles (Flush-fit)

Complimentary ironmongery manufactured in satin stainless steel. Should a specific finish be required the leaf can be provided without cut-outs.

**Rectangular  
Flush Pull Set**  
Order Code  
SEL-PRT-01592

**Square  
Flush Pull Set**

# Complimentary training for both **specifiers** and **installers**

## TRAINING & CERTIFICATION

Selo Academy has been designed to create an immersive and engaging environment for specifiers and installers at all stages of their career.

Practical training is provided by our product technicians. We join you on-site to complete a real-world installation demonstration.

### How the Training Day is structured:

#### Technical & Theory

Harry Purdom starts the day with a theory-based educational session covering the product features to assist with installation and the different applications to ensure compliance.

#### Practical Installation

Installation training with a fitting demonstration from our site technician, then installing the doors under observation. Featuring technical tips and tricks to ensure a compliant and simple installation.

#### Common Mistakes

Lessons learned session. All featured from Enigma's vast experience with pocket doors on site – what to look out for and what to be aware of.

# Building. Better.

## Support

Surrounding your project

halo  
assist

## Project assistance **at every stage**

**call** 020 3880 0339 **email** [support@enigmapocketdoors.com](mailto:support@enigmapocketdoors.com)

### STAGE #1

#### Concept

Our engagement at the initial concept stage helps to ensure that design aspirations can be achieved and compliance requirements fulfilled.

### STAGE #2

#### Specification

Providing in-depth support in clarifying the project specification, securing all necessary compliance certification and if required, conducting site visits.

### STAGE #3

#### Execution

As soon as a confirmed order is placed we assign a dedicated Project Manager. We will come to site and go through the schedule, provide an install demo, and conduct a compliance review.
