Why Enigma?

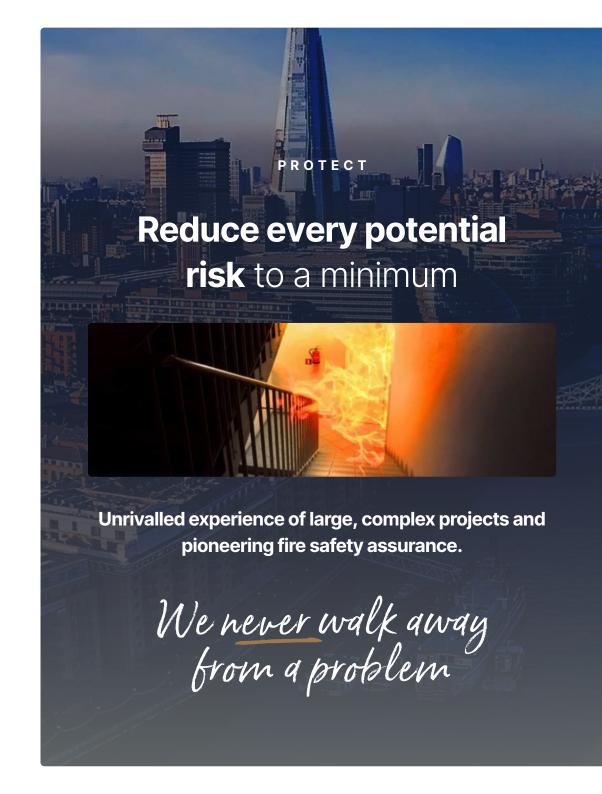

Brand Promise

Since we founded in 2008, we've consistently explored opportunities to simplify bespoke and complex building methods

Replacing them with dependable systems that deliver consistent, premium outcomes. We focused on specialist doors and that's still the core of our business now.

There are three key promises we keep to add value to our customers:

INNOVATE

We have a **legacy of** industry-leading **innovation**

Our continuous development drive has led us to the forefront of industry innovation.

Our innovations become the industry norms Give detailed project assistance at every stage

SUPPORT

Proven process and industry expertise to ensure everything works out as intended.

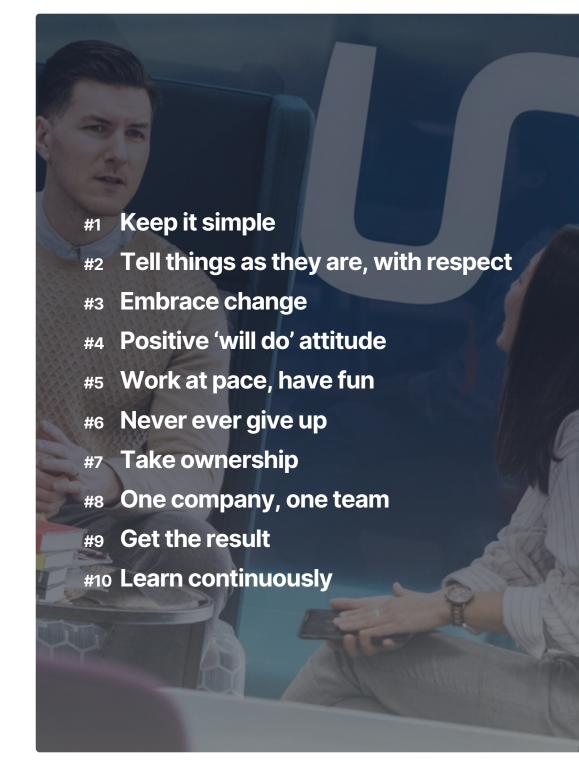

Support surrounding your project

Why Enigma?

Core Values

We own a set of **principles** that we live by. These ten core values run through the heart of our organisation

Whether it be the products and services we provide, the way we treat our staff or the way we run the business. We apply these values to everything that we do:

Pocket Door Training

Complimentary Support

CPD & **Breakfast Morning** Presentations:

Unveiling Design Brilliance

Aimed at Interior Designers, this presentation helps you to understand the potential design options of Enigma Pocket Doors through product samples.

Understanding Pocket Doors

Discover the range of unique design options and system enhancements that can be achieved using pocket doors.

Product samples are used to demonstrate how the system works.

PRESENTATION

The Pocket Door Movement

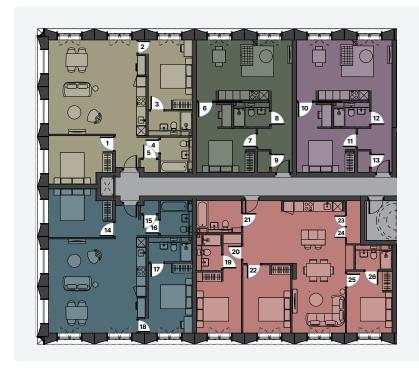

Maximise space and value by making the switch from dated swing-doors to modern pocket doors; increase usable floor space, enhancing accessibility, and usability.

Why Pocket Doors?

System Benefits

Maximise Value with **Pocket Doors**

Apartments with x26 Swing Doors

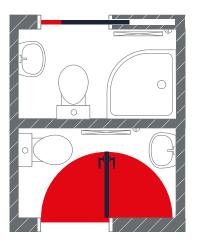

x26 Pocket Doors **MORE USABLE SPACE!**

Optimise Space

Maximise the value of your development with pocket doors:

- ✓ Maximise your Floor Space
- **Maximise the number of Apartments in your Development**
- ✓ Make your Interior Design stand out from the crowd!

Swing Door vs. Pocket Door

Concealed frame, shadow-gap or visible trim options are available in a range of flexible sizes. The simple, modular design allows for rapid installation. Adapt your design with optional features, such as:

- √ Full-height
- **✓** Perpendicular Wall
- **✓** Bespoke Joinery Integration
- ✓ Offset Wall Thickness

Increase Versatility

Enhance your interiors with high performance pocket doors which increase versatility by offering acoustic reduction, power assistance or even as room divides to extend space for entertaining.

- **✓** Room Dividers
- **✓** Enhanced Disabled Access
- **✓** Power-assisted Opening
- ✓ Acoustic, Smoke and Fire-rated Options

Why Enigma Pocket Doors?

System Benefits

Better by Design

System **Design**

The pocket door must operate smoothly and consistently without hampering the user experience.

Quality hardware is paramount for a fluid, soft close, as opposed to a wobbly, squeaky rattle! The system must also be designed so that it is easy to install consistently, limiting performance issues which may arise from poor installation.

See p12 for Pocket Door Kits

We can help you achieve the best possible design and specification with our vast experience of different projects using different interfaces and materials.

Why Enigma Pocket Doors?

Kit Components

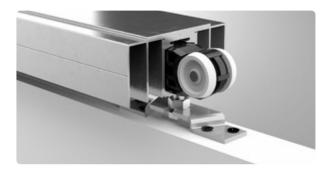

FSC Responsibly Sourced Timber

Base Channel

The leading edge and intermediate jambs slot into the base channel of the Enigma pocket door system and are fixed into place. The door guide pin is used to keep the door in-line.

Gear Sets

The standard sliding gear set is surface-mounted to the top of the sliding door and runs within the Head Channel. The gear sets are tested to EN 1527 1998 up to 100,000 cycles.

Head Channel Junction

The leading edge and intermediate jambs are slotted into the head channel and fixed into place once plumb.

Strike Jamb

The strike jamb features rubber batwing seals so when the door is closed the leaf sits within the sealed recess. The door frame is either concealed by jointing up to, or visible trims are added.

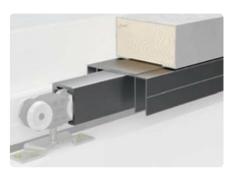

Leading Edge Jamb

The leading edge jamb of the Enigma pocket door system is the leading support of the pocket which has a side flange for the plasterboard to butt up against.

Intermediate Jamb

The intermediate jamb forms the rest of the pocket. The aluminum profile has a timber insert which provides extra strength and facilitates easy fixing.

Head Channel

The head channel for the Enigma pocket doors is the same width as the stud, making it simple to accurately place and fix to the head stud.

Range Overview

The most *comprehensive* pocket door range

Standard Non Fire Rated The original pocket door system 14	Glazed Metal Framed Fenestra® Metal-framed pocket door leafs	26
EI30 Fire Rated	Telescopic	
30 minute fire rated 16	Double-door spans within the footprint of single	28
Acoustic Rated	Glass Leaf	
Up to 30dB acoustic attenuation with added smoke rating 18	Allow light to travel through rooms	30

Slide open and closed with powered pocket doors

Design Versatility

Never compromise functionality or beautiful design, when it comes to using pocket doors.

We offer a comprehensive range of options including fire-rated, acoustic, and smoke-rated pocket doors, as well as concealed, shadow gap, or visible trim designs to empower, rather than constrain designers' creativity. Additionally, the inclusion of a self-supporting head can be utilised when the pocket door kit cannot be directly attached to the ceiling or floor slab.

Enhanced Accessibility

A contactless electromagnetic propulsion system silently opens and closes doors with minimal to no user handling required.

By eliminating the need for physical contact, it offers a hygienic and convenient solution, particularly in environments where cleanliness and ease of access are paramount such as healthcare facilities, commercial buildings, or residential settings. The advanced propulsion system ensures smooth and efficient door operation while enhancing overall user experience.

See p24 for Power-assisted Pocket Doors

Rapid Installation

Installation is incredibly simple and fast with user-friendly instructions and straightforward assembly.

Even those with limited experience can easily complete the installation process in no time. For large quantity orders the pre-assembled kit can reduce errors and simplify scheduling for tradespeople. Pre-assembled pocket door kits are also popular for their on-site space-saving benefits and a factory-built quality assurance.

See p34 for Pocket Door Enhancements

See p14 for Pocket Door Kits

Standard Non Fire Rated

The original pocket door kit has been refined for modern construction methods to maximise space and elevate design aesthetics where fire rating isn't necessary.

Premium components and cutting-edge innovation, promising an unparalleled experience. Commonly found in apartment buildings, they grace corridors leading to bathrooms and bedrooms, elevating spaces with their exceptional quality and design.

Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Acoustic Rated

Reduce the transmission of sound, quickly and simply with El30Sa acoustic rated sliding pocket doors, offering up to 30 minutes fire and smoke protection.

Within contemporary open-plan spaces, it's essential to have the ability to isolate sound when needed. Acoustic pocket doors are the perfect solution, allowing for the maximum amount of clear floor space whilst open, with the required reduction in sound when closed.

Power Assisted Motus®

Power-assisted pocket doors utilise a contactless electro magnetic propulsion system to silently open and close the door with no or minimal user handling.

The standard method to control the powered doors is by using 'nudge and go'; simply nudge the door open or closed and Motus will assist with the rest. An optional 'Touchless sensor' can be fitted to the wall, simply move your hand in front of the sensor to activate the door.

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Glazed Metal Leaf Fenestra®

A touch of glass! Aluminium framed glazed pocket doors are an elegant, effective way of making an interior design statement.

A luxury upgrade for high end residential applications, beautifully engineered for architects, designers and end users. Each door leaf is custom made to your specification.

Configurations

Fenestra is built to your individual project requirements in a range of different design styles.

Fenestra® Framed Glass

6-8mm thick glass enclosed within a aluminium frame for the ultimate 'Picture-frame' feature pocket door.

Fenestra® Ladder Design

Horizontal bars integrated within the door frame break-up the glazing to create a subtle Art-Deco design style.

Fenestra® Glazing & Infill

Completely customisable the door can combine glazing, horizontal and vertical bars as well as infill panels.

Sustainably sourced timber parts. System tested to over 100k cycles. Supports doors up to 140kg.

100k Cycle Load Tested

Glass Leaf

For the ultimate frameless finish, the Enigma system can be provided with a glass leaf enabling you to retain light and control privacy.

When using a glass leaf the opening width of the jambs are reduced to suit the thinner door. Specially designed glass clamps are provided with the sliding gear.

Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Enigma Pocket Doors

Trim options to suit your interior design

Concealed Frame

Enhance your contemporary interior with a minimalist design and seamless aesthetics.

Shadow-gap Frame

Creating clean, minimalist lines, Shadow Gap adds a subtle, unique feature to the room.

Visible Trim

An elegant, traditional look, Visible Trim Enigma is for use with architraves.

Technical Details

Enigma Pocket Doors

Door Leaf options

Laminated Timber

Solid timber core with hardwood lippings on all 4 sides with a tough laminate coating for added durability.

Painted Timber

Solid timber core with hardwood lippings on all 4 sides, painted to a RAL colour of your choice.

Veneered Timber

Solid timber core with hardwood lippings on all 4 sides, veneered in your choice of timber.

Glass

Glass leaf for enhanced light and style. Choose form clear or obscured/privacy glass.

Technical Details

Enigma Pocket Doors

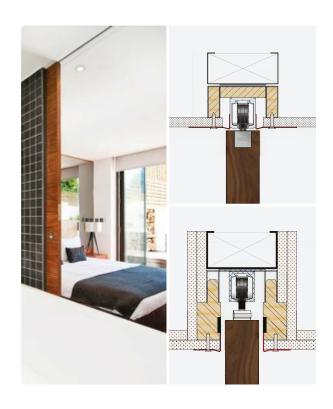

Optional enhancements elevating user experience

Soft Close/Open

The redesigned mechanism allows the unit to be serviceable once installed and also retrofitted for complete flexibility. The aluminium body houses a hydraulic, self-lubricating damper with acetal running gear. Integrating caged needle bearings, designed for oscilating movement, making it both durable and maintenance-free!

- √ 100k cycle tested (at full-load)
- √ Simple to install and retro-fit
- √ Supports up to 120kg
- √ No maximum door width

Full Height Flush Head Kit

Full height, floor to ceiling Enigma doors give the ultimate open and spacious feel. Available in both non fire rated and El30 configurations.

Self-supporting Head Kit

For situations where fit the head of the pocket door kit won't fit directly to the ceilings, or floor slab and deflection tolerance is required. Enables the head to be fitted either end and support up to 120kg.

Pre-assembled Kit

Revolutionising installation convenience with pre-assembled kits tailored to seamlessly fit your structural openings.

Perpendicular Wall

Used for applications where a door closes against a flat wall; the perpendicular wall jamb profile is provided.

Self-close

The closer is provided with infinite adjustment providing an extremely user friendly experience. Suitable for doors up to 900mm wide.

Order Code SEL-PRT-00923

Touch Latch

130N touch latch allows you to completely conceal the door leaf within the cavity and removes the need for a finger pull.

Order Code SEL-PRT-00619

Simultaneous Opening

Open both doors while only operating one leaf.

Locks (Flush-fit)

Privacy locks with integral thumb turn, handle and emergency coin release.

Non Fire Rated Sliding Door Lock Order Code

SEL-PRT-00290

Sliding Door Lock Order Code

Showroom

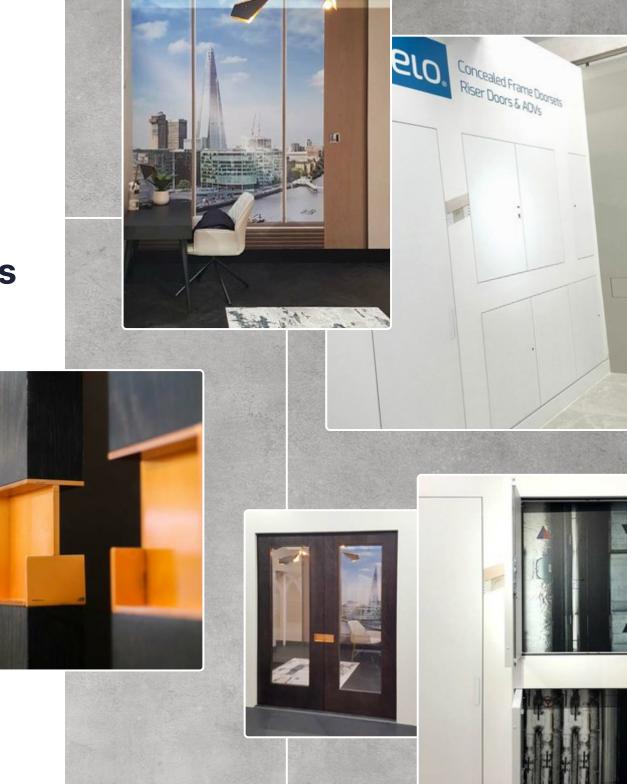

London WC1E 7BT

A space for **Architects**, **Designers and Contractors** to share and enjoy

Our Hub is located within the Building Centre, Bloomsbury. The centre showcases the best in materials and manufacturing alongside the work of leading architects and designers to inform and inspire.

Product Training & Certification

Complimentary training for both **specifiers** and **installers**

TRAINING & CERTIFICATION

Selo Academy has been designed to create an immersive and engaging environment for specifiers and installers at all stages of their career.

Practical training is provided by our product technicians. We join you on-site to complete an real-world installation demonstration.

How the Training Day is structured:

Technical & Theory

Harry Purdom starts the day with a theory-based educational session covering the product features to assist with installation and the different applications to ensure compliance.

Practical Installation

Installation training with a fitting demonstration from our site technician, then installing the doors under observation. Featuring technical tips and tricks to ensure a compliant and simple installation.

Common Mistakes

Lessons learned session.
All featured from Enigma's vast experience with pocket doors on site – what to look out for and what to be aware of.

Support

Surrounding your project

Project assistance at every stage

call 020 3880 0339 email support@enigmapocketdoors.com

STAGE #1

Concept

Our engagement at the initial concept stage helps to ensure that design aspirations can be achieved and compliance requirements fulfilled.

STAGE #2

Specification

Providing in-depth support in clarifying the project specification, securing all necessary compliance certification and if required, conducting site visits.

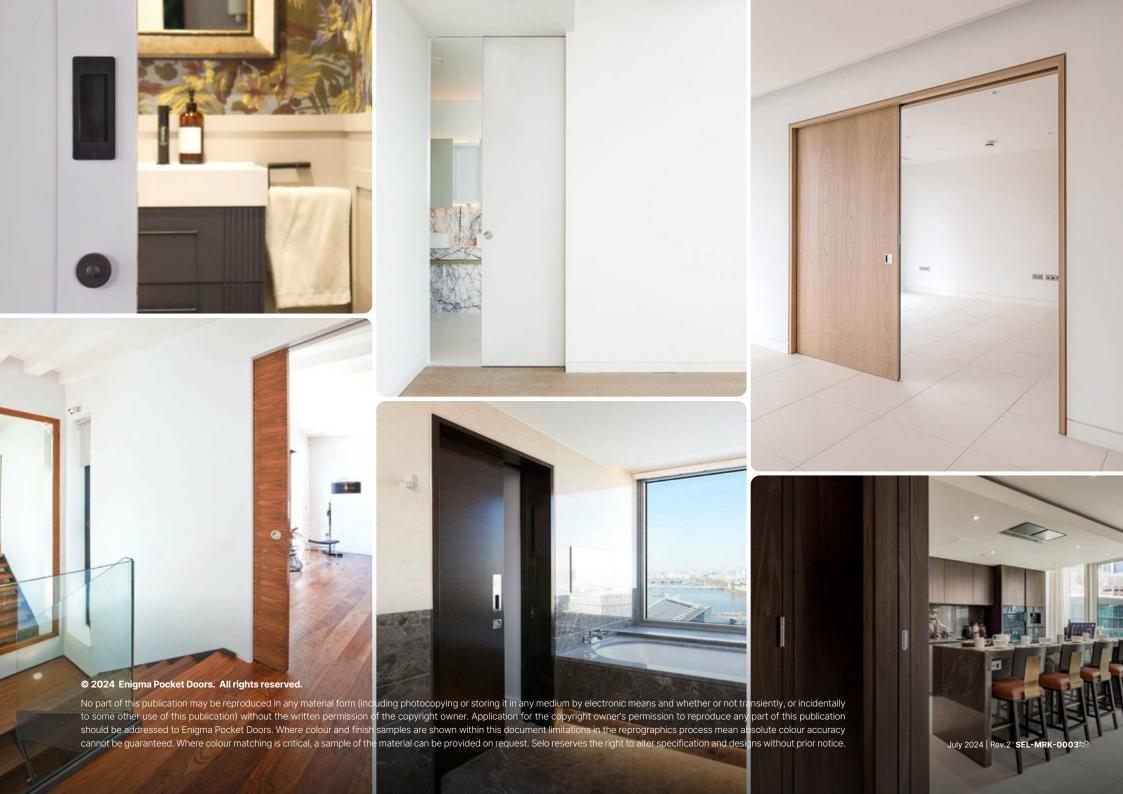

STAGE #3

Execution

As soon as a confirmed order is placed we assign a dedicated Project Manager. We will come to site and go through the schedule, provide an install demo, and conduct a compliance review.
