Why Enigma?

Brand Promise

Since we founded in **2008**, we've consistently explored opportunities to **simplify bespoke and complex building** methods

Replacing them with dependable systems that deliver consistent, premium outcomes. We focused on specialist doors and that's still the core of our business now.

There are three key promises we keep to add value to our customers:

Scan QR to view more
enigmapocketdoors.com/why-enigma

PROTECT

Reduce every potential risk to a minimum

Unrivalled experience of large, complex projects and pioneering fire safety assurance.

We never walk away from a problem

INNOVATE

We have a **legacy** of
industry-leading **innovation**

Our continuous development drive has led us to
the forefront of industry innovation.

*Our innovations become
the industry norms*

SUPPORT

Give **detailed project
assistance** at every stage

Proven process and industry expertise to
ensure everything works out as intended.

*Support surrounding
your project*

Why Enigma?

Core Values

We own a set of **principles that we live by.** These ten core values run through the heart of our organization

Whether it be the products and services we provide, the way we treat our staff or the way we run the business. We apply these values to everything that we do:

- #1 **Keep it simple**
- #2 **Tell things as they are, with respect**
- #3 **Embrace change**
- #4 **Positive 'will do' attitude**
- #5 **Work at pace, have fun**
- #6 **Never ever give up**
- #7 **Take ownership**
- #8 **One company, one team**
- #9 **Get the result**
- #10 **Learn continuously**

CPD & Breakfast Morning Presentations:

PRESENTATION

Unveiling Design Brilliance

Aimed at Interior Designers, this presentation helps you to understand the potential design options of Enigma Pocket Doors through product samples.

CPD

Understanding Pocket Doors

Discover the range of unique design options and system enhancements that can be achieved using pocket doors. Product samples are used to demonstrate how the system works.

PRESENTATION

The Pocket Door Movement

Maximize space and value by making the switch from dated swing-doors to modern pocket doors; increase usable floor space, enhancing accessibility, and usability.

Scan QR to book
support@enigmapocketdoors.com

Why Pocket Doors?

System Benefits

Maximize Value with Pocket Doors

Apartments with
x26 Swing Doors

x26 Pocket Doors
= 420 ft²
MORE SPACE!

*Saves the space
of a Bedroom
& En-suite!*

Optimize Space

Maximize the value of your development with pocket doors:

- ✓ Maximize your Floor Space
- ✓ Maximize the number of Apartments in your Development
- ✓ Make your Interior Design stand out from the crowd!

Swing Door vs. Pocket Door

Scan QR to view more
enigmapocketdoors.com/maximise-value

Enhance **Design**

Visible trim or concealed frame options are available in a range of flexible sizes. The simple, modular design allows for rapid installation. Adapt your design with optional features, such as:

- ✓ **Full-height**
- ✓ **Perpendicular Wall**
- ✓ **Bespoke Joinery Integration**
- ✓ **Offset Wall Thickness**

Increase **Strength**

Enhance your interiors with high performance pocket doors which increase versatility by offering acoustic reduction, power assistance or even as room dividers to extend space for entertaining.

- ✓ **Room Dividers**
- ✓ **Enhanced Disabled Access**
- ✓ **Power-assisted Opening**
- ✓ **Acoustic Option**

Why Enigma Pocket Doors?

System Benefits

Better by *Design*

System Design

The pocket door must operate smoothly and consistently without hampering the user experience.

Quality hardware is paramount for a fluid, soft close, as opposed to a wobbly, squeaky rattle! The system must also be designed so that it is easy to install consistently, limiting performance issues which may arise from poor installation.

See p12 for Pocket Door Kits

Scan QR to view more
enigmapocketdoors.com/by-design

1 Trim Options

Concealed, or Visible Trim options to suit your interior design.

2 Extruded Aluminum Construction

Durable construction giving maximum strength for the minimum wall thickness.

3 100k Cycle-tested (under load)

Rigorously tested to withstand a lifetime of use for complete peace of mind.

4 Up to 300lbs Load

The super strong construction is capable of supporting solid timber doors up to 300lbs.

5 Stud-like Construction

Adaptable to support bespoke joinery, perpendicular walls, off-set wall build-ups.

6 Ribbed Surfaces

Ribbed extruded aluminum provides additional grip and stability when fixing the drywall.

7 Design Support

We can help you achieve the best possible design and specification with our vast experience of different projects using different interfaces and materials.

Why Enigma Pocket Doors?

Kit Components

FSC Responsibly
Sourced Timber

Base Channel

The leading edge and intermediate jambs slot into the base channel of the Enigma pocket door system and are fixed into place. The door guide pin is used to keep the door in-line.

Gear Sets

The standard sliding gear set is surface-mounted to the top of the sliding door and runs within the Head Channel. The gear sets are tested to 100,000 usage cycles.

Head Channel Junction

The leading edge and intermediate jambs are slotted into the head channel and fixed into place once plumb.

Strike Jamb

The strike jamb features rubber batwing seals so when the door is closed the leaf sits within the sealed recess. The door frame is either concealed by jointing up to, or visible trims are added.

Leading Edge Jamb

The leading edge jamb of the Enigma pocket door system is the leading support of the pocket which has a side flange for the plasterboard to butt up against.

Intermediate Jamb

The intermediate jamb forms the rest of the pocket. The aluminum profile has a timber insert which provides extra strength and facilitates easy fixing.

Head Channel

The head channel for the Enigma pocket doors is the same width as the stud, making it simple to accurately place and fix to the head stud.

Pocket Door Kits

Range Overview

The most *comprehensive* pocket door range

Standard Non Fire Rated

The original pocket door system

14

Acoustic Rated

Up to 30dB acoustic attenuation with added smoke rating

16

Power-assisted *Motus*®

Slide open and closed with powered pocket doors

18

Glazed Metal Leaf *Fenestra*®

Metal-framed pocket door leafs

20

Glass Leaf

Allow light to travel through rooms

22

Design **Versatility**

Never compromise functionality or beautiful design, when it comes to using pocket doors.

We offer a comprehensive range of options including acoustic and smoke-rated pocket doors, as well as concealed or visible trim designs to empower, rather than constrain designers' creativity. Additionally, the inclusion of a self-supporting head can be utilized when the pocket door kit cannot be directly attached to the ceiling or floor slab.

See p14 for Pocket Door Kits

Enhanced **Accessibility**

A contactless electromagnetic propulsion system silently opens and closes doors with minimal to no user handling required.

By eliminating the need for physical contact, it offers a hygienic and convenient solution, particularly in environments where cleanliness and ease of access are paramount such as healthcare facilities, commercial buildings, or residential settings. The advanced propulsion system ensures smooth and efficient door operation while enhancing overall user experience.

See p18 for Power-assisted Pocket Doors

Rapid **Installation**

Installation is incredibly simple and fast with user-friendly instructions and straightforward assembly.

Even those with limited experience can easily complete the installation process in no time. We are also the only supplier to offer a pre-assembled kit for large quantity orders, minimizing errors and simplifying scheduling for tradespeople. Increasingly popular for their space-saving benefits and factory-built quality assurance.

See p28 for Pocket Door Enhancements

Pocket Door Kits

Standard Non Fire Rated

The original pocket door kit has been refined for modern construction methods to maximize space and elevate design aesthetics where fire rating isn’t necessary.

Premium components and cutting-edge innovation, promising an unparalleled experience. Commonly found in apartment buildings, they grace corridors leading to bathrooms and bedrooms, elevating spaces with their exceptional quality and design.

Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Pocket Door Kits

Acoustic Rated

Reduce the transmission of sound, quickly and simply with an acoustic rated sliding pocket door.

Within contemporary open-plan spaces, it's essential to have the ability to isolate sound when needed. Acoustic pocket doors are the perfect solution, allowing for the maximum amount of clear floor space whilst open, with the required reduction in sound when closed.

Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Pocket Door Kits

Power Assisted *Motus*[®]

Power-assisted pocket doors utilize a contactless electro magnetic propulsion system to silently open and close the door with no or minimal user handling.

The standard method to control the powered doors is by using 'nudge and go'; simply nudge the door open or closed and Motus will assist with the rest. An optional 'Touchless sensor' can be fitted to the wall, simply move your hand in front of the sensor to activate the door.

Configurations

Designed to suit a range of opening sizes, simply cut-to-size to suit your exact opening.

Enigma Pocket Doors

Frame/trim options to suit your interior design

Concealed Frame

Create contemporary interiors with a minimalist design and seamless aesthetics.

Visible Trim

An elegant, traditional look, Visible Trim Enigma is for use with architraves.

Soft close/open for the ultimate experience

Order Code
SEL-PRT-00368 / SEL-PRT-00557

Soft Close/Open

Dampened opening and closure to create the ultimate finish to the sliding doors.
The modular unit makes installation simple.

Technical Details

Enigma Pocket Doors

Optional enhancements elevating user experience

Pre-assembled Kit

Revolutionizing installation convenience with pre-assembled kits tailored to your structural openings. For large quantities of standard sizes.

Full Height Flush Head Kit

Full height, floor to ceiling Enigma doors give the ultimate open and spacious feel.

Self-supporting Head Kit

For situations where fit the head of the pocket door kit won't fit directly to the ceilings, or floor slab and deflection tolerance is required. Enables the head to be fitted either end and support up to 260lbs.

Order Code
SEL-PRT-00924

Perpendicular Wall

Used for applications where a door closes against a flat wall; the perpendicular wall jamb profile is provided.

Order Code
SEL-PRT-00923

Simultaneous Opening

Open both doors while only operating one leaf.

Self-close

The closer is provided with infinite adjustment providing an extremely user friendly experience. For doors up to 35 inches wide.

Order Code
SEL-PRT-00619

Touch Latch

130N touch latch allows you to completely conceal the door leaf within the cavity and removes the need for a finger pull.
