

## ENHANCEMENTS

# Soft Close/Open

**NEW  
Design**

The redesigned mechanism allows the unit to be serviceable once installed, and for complete flexibility, can also be retrofitted.

The body houses a hydraulic, self-lubricating damper with acetal running gear. Integrating caged needle bearings, designed for oscillating movement, making it both durable and maintenance-free!

- ✓ **100k cycle tested (at full-load)**
- ✓ **Simple to install and retro-fit**
- ✓ **No maximum door width**
- ✓ **Supports up to 120kg**
