SLIDING POCKET DOORS

Effortless  
access

INNOVATION BY SELO.

**Enigma Motus**  
Powered pocket doors

# Effortless activation with a smooth and silent operation

Enigma Motus utilises a contactless electro magnetic propulsion system to silently open and close the sliding pocket door with no or minimal handling of the door itself.

Motus powered sliding door can be controlled in a choice of ways depending on your application:

### Nudge and go

The standard method; simply nudge the door open or closed and Motus will assist with the rest.

### Touch-less sensor

The sensor is fitted to the wall, by simply moving your hand in front of the sensor this activates the door.

Utilise every square inch of your room™

## ENIGMA MOTUS

### Design options

#### Visible frame

An elegant, traditional look, Visible Frame Enigma is for use with architraves.

#### Concealed

Enhance your contemporary interior with a minimalist design with seamless aesthetics.

#### Shadow gap

Creating clean, minimalist lines, Shadow Gap adds a subtle, unique feature to the room.

## ENIGMA MOTUS

### Extras

Designed to enhance your system and tailor its functionality to suit your individual application.

#### - Simultaneous opening

For use with double doors, when one leaf is activated the other follows suit in a seamless fashion.

#### Fire rated to FD30

- All trim designs (Visible / Concealed / Shadow Gap)
- All configurations
- Wide range of sizes

ENIGMA MOTUS

## System codes

Specify trim type by adding the codes below:

C = Concealed Frame / T = Visible Frame / S = Shadow Gap

### Motus

#### Wall build up

- 94mm stud
- 1 or 2 layers of 12.5mm plasterboard  
(Depending on trim type)

#### Important

When using door heights of 2.3m+ it is recommended the wall is double boarded. This results in a 145mm wall thickness.

**NOTE** If using 2 layers of 12.5mm plasterboard add '145' to the product code.
